

INTERLOCKED SAFETY GUARDS WITH PNEUMATI DEVICE

QCP 02

PRODUCT SHEET

Last update: 04/13/2023

Panel to be used only on safety guards with pneumatic blocking system

Pneumatic control panel for the blocking system of the safety guards rotation axis according to the presence of potential difference between the motor phases. The system allows the opening of the guard only when the rotor is completely stopped and has a safety control which, in the absence of air, prevents the machine from functioning by signaling the presence of the system malfunction with a warning light on the front panel. Equipped with a button reset system on the front panel to reinitialize the control module in the event of temporary malfunctions. Prepared for the use of additional alarm systems, acoustic and visual ones.

BOX DIMENSION (W x H x D): 250x300x150mm

OPTIONAL: BRACKET RZA 62

Our protections comply with the machinery directive 2006/43/CE
