The device is fixed to the existing toolcase turret of lathe and, its particular shape, with three different opening position of the anterior arms of support, allows to sand bars of different diameters.

Thanks to the tension springs the belt always adheres in the best way.

The perfect efficiency of the abrasive part of the sanding belt is guaranteed by an automatic sliding system (Patented) which exploits the rotating movement of the piece worked.

The following device is available in three different sizes with spare abrasive belts of different grit.
